

Artemisia C-08UC Complex® is primarily composed of skin-relevant ingredients extracted from the plant Artemisia Annua (one-year-old mugwort). Specifically made for cosmetic applications, it is a natural source of strength for the skin and a protective shield against skin aging.

High-quality ingredients are influenced by the unique growing conditions in the Swiss Alps, the plant parts used, and, last but not least, the special extraction process.

Plants used in our 72k product line are organically grown in Valais (Switzerland) and gently hand-harvested.
